

The world class CAD Solution that boosts up the IntelliCAD power

4MCAD is the result of 25 years rich experience in the building design industryand 10 years intensive RnD design to meet the ideal CAD alternative.

4MCAD environment, provides among others full DWG compatibility, similar environment and absolute support for the AutoCAD® commands, entities, tools and practices.

4MCAD speeds and performances are totally unbeatable, explaining the reason why it has become the standard in the world CAD market, in over 50 countries.

4MCAD is available in four versions:

- 4MCAD Viewer: CAD Viewing & Printing plus adding texts & dimensions
- 4MCAD Classic: 2D/3D CAD Complete Design
- ◆4MCAD Standard: 4MCAD Classic + Raster Image + Rendering
- 4MCAD PRO (Professional): 4M-IntelliCAD Standard + 3D Solids + VBA support + Library Manager

Unrivaled Autodesk AutoCAD compatibility

- Native DWG support (Opendwg)
- Full DWG compatibility with any AutoCAD version (2.5 to 2009)
- Full compatibility with AutoCAD Command Line, menu files (.MNU), script (.SCR) files, hatches, fonts, true type fonts and all Management: Raster image manager, Xref manager, Layers/Properties, Filter, Audit & Recover etc.
- Publishing & plotting: Paper space, File exporting (wmf, dwf, pdf etc), autocad-like plotting etc.
- Programming: Full AutoLISP support, ADS support and others
- Drawing entities & tools: AutoCAD 3D surface commands, polar tracking, complex linetypes, multiline text, lightweight polyline, draworder, highlight etc.

Exceptional productivity

- Multiple open drawings (MDI), ActiveX support
- Multiple layouts Drawing Explorer for managing layers-blocksline types and more
- Graphical block preview
- Real Time Pan & Zoom
- i-Drop technology
- Right-mouse click to edit properties of multiple selected entities
- Very fast and high quality Hide-Shade functions
- Script recorder
- ActiveX objects integration (word texts, excel tables etc)
- Visual customization of menus and toolbars
- High quality Photorealistic 3D rendering (ray tracing)
- Powerful 3D Solid Modeling (ACIS compatible)
- Open Communication regarding Import/Export of all the usual type files (DWG, DXF, WMF, EMF, PDF etc), Read/Write of bitmap images within DWG files (GIF, JPG, TIF, PCX etc).
- Multilingual versions

Memory Optimization & advanced algorithms for unbeatable high speeds

4MCAD adopts state-of-the-art software engineering structures and techniques in order to achieve very fast viewing operations (zoom, pan, redraw etc) even in very large drawings.

4M CAD is being developed through its own production line, on very demanding specifications to accept the entire Suite of the 4M Verticals, IDEA (Architectural Design), FINE MEP (Mechanical, Electrical & Plumbing Design), STRAD (Structural Analysis Design).
